The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1647

### **DETAILED ACTION**

### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03 January 2005 has been entered.

## Status of Application, Amendments and/or Claims

The amendment filed 03 January 2005 has been entered in full. Claims 1-29 and 37-42 are cancelled. Claims 30-36 are under examination.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

# Claim Rejections - 35 USC § 112, First Paragraph, Enablement

Claims 30-36 remain rejected under 35 U.S.C. 112, first paragraph, enablement. The basis for this rejection is set forth at pages 3-5 of the previous Office Action (02 December 2003).

Art Unit: 1647

Applicant submits that direction and guidance are provided throughout the specification for the instant invention. Applicant cites pages in the specification for support. Applicant states that the present application recognizes for the first time that cytokines, such as oncostatin M (OSM), interleukin-6 (IL-6), interleukin-11 (IL-11), leukemia inhibitory factor (LIF) and epidermal growth factor (EGF), have inhibitory effects on the proliferation of malignant breast cancer cells. Applicant states that the specification provides a thorough characterization of the inhibitory effects of OSM on the proliferation of malignant breast cancer cell in vitro, including inhibitory doses, and the effects on cell cycle, cell morphology and the expression of various cell surface receptors. Applicants maintain that those skilled in the art would consider that the in vitro characterizations provided in the specification are reasonably correlated to inhibitory effects of the selected cytokines on the proliferation of malignant breast cancer cells in vivo. Applicant maintains that they do not dispute that obstacles may exist, or that additional experimentation may be required to optimize the parameters for in vivo administration of a selected cytokine. Applicant contends that there is no evidence that the obstacles constitute undue experimentation and that some experimentation is permissible.

Applicant's arguments have been fully considered but not deemed persuasive. A considerable amount of time is permissible for the quantity of experimentation needed to make or use the invention based on the disclosure. However this depends on if the invention is routine or if the skilled artisan is given sufficient direction or guidance. In the instant case, the experimentation is not routine and Applicant has provided little

Application/Control Number: 09/819,097

tumor and cell-cell interactions.

Page 4

etc. are prophetic examples. The specification fails to teach the use of recognized animal models for cancer treatment. The specification need not contain an example if the invention is otherwise disclosed in such manner that one skilled in the art will be able to practice it without an undue amount of experimentation. Lacking a working example however is a factor to be considered, especially in a case involving an unpredictable and/or undeveloped art. The Examiner cited various scientific references in the previous Office Action, to demonstrate the problems with correlating *in vitro* data with *in vivo* treatments and the unpredictability regarding anti-cancer drug discovery for cancer treatments. Based on the references provided by the Examiner, one skilled in

the art would not consider the in vitro characterizations provided in the specification

correlated to inhibiting the proliferation of malignant breast cancer cells in a mammal.

Characteristics of cultured cell lines generally differ significantly from the characteristics

of a primary tumor. Cells in culture exhibit characteristics different from those in vivo

and cannot duplicate the complex conditions of the in vivo environment involved in host-

guidance. The pages cited by Applicant regarding amounts, administration, frequency,

The scientific reasoning and evidence as a whole indicates that the rejection should be maintained.

#### Conclusion

No claims are allowed.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Regina M. DeBerry whose telephone number is (571)

272-0882. The examiner can normally be reached on 9:00 a.m.-6:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Brenda G. Brumback can be reached on (571) 272-0961. The fax phone

number for the organization where this application or proceeding is assigned is 703-

872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
